Open Source vs. Paid JIRA Alternatives
☐   **Security questions vs. security guarantees**
☐   **Will it be scaleable in the future?**
☐   **Does the product have a consistent, stable history?**
☐   **Is it usable or clunky?**
☐   **With administration costs, are you really saving money?**
☐   **Can you build a solid customization on top of it?**
☐   **Are there existing, robust add-ons?**
☐   **Is the documentation good, or is the platform community active and knowledgeable?**
